Personal Portfolio Webpage — Consolidated Project Report

B.TECH CSE PROJECT

DEVELOPER	PROGRAM	TECH STACK	THEME
Hemanth	B.Tech CSE (AI&ML)	HTML5 & CSS3	Purple & Pink Accent

1. PROJECT OVERVIEW & WEBPAGE PREVIEW

This project delivers a responsive, lightweight personal portfolio webpage designed to present academic credentials, technical skills, and direct contact details in an elegant visual layout.

Figure 1. Live layout preview rendered from the HTML and CSS styling.

2. MAIN FEATURES

Feature	Description
Header	Displays student name and the role title ("B.Tech CSE Student | Web Developer").
Navigation Menu	Provides smooth anchor links to About, Education, Skills, and Contact sections.
About Section	Presents background details and interest in Web Development and AI/ML.
Education Section	Summarizes current enrollment (RVR NRIIT) and Intermediate score (94.1%).
Skills Section	Renders interactive skill chips for HTML, CSS, and Python.
Contact Section	Includes primary email, phone contact, and a "Download Resume" CTA button.
Footer	Contains copyright attribution and portfolio owner details.

3. IMPLEMENTATION DETAILS & ANALYSIS

HTML & CSS Architecture
HTML structure establishes semantic tags (`<header>`, `<nav>`, `<section>`, `<footer>`). Styled using standard CSS properties for flex layout, colored borders, and rounded container cards (`border-radius: 10px`).

Project Limitations & Future Scope
The "Download Resume" button is currently UI-only. Email/phone are plain text entries without backend forms. Future iterations will integrate JavaScript interactivity and dynamic form handling.
